

2018 Town of Auburn Report

By Southern New Hampshire Planning Commission

The Southern New Hampshire Planning Commission (SNHPC) has a wide range of services and resources available to help member communities deal with a variety of municipal issues. Technical assistance is provided by a professional staff whose expertise is, when necessary, supplemented by consultants selected for their specialized skills or services. Each year, with the approval of appointed representatives, the Commission's staff designs and carries out programs of regional significance mandated by New Hampshire and federal laws or regulations, as well as local projects which pertain more exclusively to a specific community.

Technical assistance is provided in a professional and timely manner by staff at the request of the Town Administrator, Town Departments, Land Use Boards, and/or Board of Selectmen. The Commission conducts planning studies and carries out projects of common interest and benefit to all member communities; keeps community officials apprised of changes in planning and land use regulations; and in conjunction with the New Hampshire

Municipal Association, offers annual training workshops for Planning Board and Zoning Board members.

In the past year, it has been the Commission's pleasure to assist the Town of Auburn with conducting traffic counts as well as collecting traffic speed data, identifying fatal and incapacitating crash locations, providing staff support for the Robert Frost/Old Stagecoach Scenic Byway, updating land use maps, and assisting the Town with updating their Hazard Mitigation Plan. New this year was SNHPC's bicycle/pedestrian counting program, including a count conducted at the corner of Hooksett and Eaton Hill Roads.

The following table details services performed for the Town of Auburn during the past year, and includes both hours worked specifically for the Town and for projects involving multiple municipalities. In the latter case, the total hours spent by SNHPC staff are divided equally by the number of communities, resulting in time allotment attributed to each of the communities. Examples of a regional project are the development of the New Hampshire Department of Transportation (NHDOT) Ten-Year Transportation Improvement Plan and the organization of a legislative event for NH Legislators and local officials in the SNHPC region.
