GIS/Spatial Analysis

A Geographic Information System (GIS) allows for the visualization, interpretation and organization of geographic data. This makes GIS an invaluable tool for understanding relationships and patterns between disparate data that would not be readily apparent otherwise. SNHPC uses GIS on a daily basis to support planning staff and region-wide efforts.

- Land Use analysis
- Providing a repository for U.S. Census data
- Maintaining/updating data for projects such as open space plans, master plans, hazard mitigation plans, zoning updates, tax mapping, road base maps, and many others.

SNHPC STAFF

Sylvia von Aulock, Executive Director
Nathan Miller, AICP, Deputy Executive Director
Madeleine Dilionno, Associate Planner
Monique Duchesne, Assistant Planner
Carl Eppich, AICP, Principal Transportation Planner
Adam Hlasny, Senior Transportation Planner
Linda Moore-O’Brien, Office Administrator
Cameron Prolman, Regional Planner
Zachary Swick, Senior GIS Analyst
James Vayo, AICP, Project Manager
Yutian Zhang, Financial Administrator

THE PEOPLE AND PLACES OF OUR REGION
OUR PURPOSE

NH has much to offer its citizens, businesses, and visitors, including breathtaking natural beauty, a talented and knowledgeable workforce, and communities with a desirable quality of life.

These great assets carry great responsibility, specifically for each town and citizen to ensure they are used in a thoughtful, prudent manner.

Communities must work together to maximize opportunities and address concerns that may cross municipal borders: transportation, environmental, and economic development issues, among others.

WHAT SNHPC DOES FOR YOU

Local and Regional Planning Assistance

SNHPC works with member communities in developing and/or updating regional plans for land use, housing, and other areas, including preparation of the State-required regional housing needs assessment every five years. Other areas of planning expertise include:

- Master Plan Development
- Hazard Mitigation Planning
- Environmental Planning
- Zoning & Land Use Regulation
- Regional Impact Project Review
- Open Space/Conservation Prioritization
- Capital Improvement Program & Impact Fee Facilitation and Updating
- Hosting public hearings for plan review and adoption of local regulations
- Assistance to various committees/associations
- Comprehensive Data Analysis & Surveying

Regional Transportation Planning

SNHPC serves as the Metropolitan Planning Organization (MPO) for the Manchester region. Other areas of transportation expertise include:

- Ensuring all transportation programs using federal funds resulted from a continuous, comprehensive, and cooperative planning process
- Developing/maintaining a Transportation Improvement Program and a Long-Range Regional Transportation Plan
- Acting as a clearinghouse/conduit for other federal and state programs
- Performing traffic counts, impact studies, and field assessments
- Performing signal warrant, high crash location, and local trip generation studies for communities in our region
- Transit Planning, including assistance to NH Transportation Council, Manchester Transit Authority, and Statewide and Regional Coord. Councils for Community Transportation
- Providing assistance to Bike Manchester, three Scenic Byway Councils, & other local transportation-related organizations
