Season Summary Statistics

April-November

441 Attempts

344 Good counts
171 Counts

12 Classification counts
Classification Counts

The image shows a graph with time on the x-axis and volume on the y-axis. The graph includes multiple curves, each representing different vehicle types or categories. The label 'Combined' indicates a cumulative or aggregated data point.

The graph appears to track the volume of different types of vehicles over time, possibly during a traffic study or analysis. The presence of a device labeled 'IBRIS' with a label suggests that this equipment is used for traffic classification or monitoring.
